

AGENDA

FINANCE COMMITTEE MEETING WEDNESDAY, MAY 10, 2023, AT 9:00 AM

This meeting may be attended in person at the District Office Boardroom at: 61750 Chollita Rd., Joshua Tree, CA 92252, by phone at 1 669 444 9171, or by video conference.

Join Zoom Meeting:

https://us02web.zoom.us/j/85256309368?pwd=ck1RcGlYU1M4V1IzVU5xbU03UUV3UT09

Meeting ID: 852 5630 9368 Passcode: 61750

- 1. CALL TO ORDER / PLEDGE OF ALLEGIANCE
- 2. ROLL CALL
- 3. PUBLIC COMMENT

This is the time set aside for public comment on any item appearing on the agenda. At the discretion of the Board President, however, comments on a particular Agenized item may be deferred until that item is heard. Please state your name and limit your comments to 3 minutes.

4. CONSENT CALENDAR

Consent calendar items are expected to be routine and non-controversial, to be acted upon at one time without discussion. If a committee member would like an item to be handled separately, it will be removed from the Consent Agenda for separate action.

- A. DRAFT FINANCE COMMITTEE MEETING MINUTES 04.05.23
- 5. **DISCUSSION ITEMS**
 - A. CHECK REGISTER MARCH 2023
 - **B. WATER CAPACITY STUDY**
- 6. **STAFF REPORTS**
- 7. DIRECTOR COMMENTS
- 8. ADJOURNMENT

JOSHUA BASIN WATER DISTRICT Minutes of the SPECIAL FINANCE COMMITTEE MEETING Wednesday, April 5, 2023

wednesday, April 5, 2023 61750 Chollita Road, Joshua Tree, CA 92252

- 1. CALL TO ORDER/PLEDGE OF ALLEGIANCE —President Floen called the meeting to order at 9:00 a.m.
- 2. ROLL CALL President Floen and Director Jarlsberg

STAFF PRESENT – Anne Roman, Director of Finance, and Autumn Rich, Accounting Supervisor, Jeremiah Nazario, Director of Operations, David Shook, Director of Administration, Lisa Thompson, Executive Assistant

GUESTS - Deborah Bollinger

- 3. PUBLIC COMMENT none
- 4. CONSENT CALENDAR
 - A. DRAFT FINANCE COMMITTEE MEETING MINUTES 03.08.23
 - 1st Jarlsberg
 - 2nd Floen

Motion carried to approve consent calendar minutes.

5. DISCUSSION ITEMS -

A. FEBRUARY 2023 CHECK REGISTER

Director Jarlsberg asked about the temporary labor amount on page 4 of February check register. Director of Finance, Anne Roman explained that the temporary labor is for the Customer Service Department. Currently, the District does not have permanent employees for the Customer Service department yet. We are going through working interviews with a temporary agency to find Customer Service Representatives to fill the positions. President Floen asked about NBS on page 6 of the February check register and delinquent CMM payers. Jarlsberg asked about Mojave Agency calendars and the amount. Roman explained that the calendars are to promote water conservation on an annual basis. President Floen asked about Nielsen Fire and Ice on page 7 about the air conditioning (second time this year). Roman explained that this item was for the new unit that was recently installed. Jarlsberg asked about SCE pumping for power bill on page 7 and how would be nice to see how it compares to other months. Jarlsberg appreciates the effort keeping up with the check registers.

1st - Jarlsberg

2nd - Floen

Motion carried to refer to the Board.

B. TILFORD PHASE 1 CIRP PROJECT WATER CAPACITY CHARGES TRANSFER

Director Jarlsberg asked how the 38% growth was determined. Interim Director of Operations, Jeremiah Nazario explained that CIRP Supervisor, Brandon Warner went over mapping and plans of parcels in the area and with an Engineering firm, which is a tedious process to get the percentage of the completed project attributed to vacant, undeveloped, and upsizing of pipe. President Floen asked about the cash flow reserved funds. Director of Finance, Anne Roman mentioned that Finance is balancing between the two cash flow reserve funds and a then choose where it can be transferred. Projects are split into phases which helps with manageability. Floen asked if we knew the amount that the General Manager can spend in case of an Emergency. Roman said that she is not aware of an amount and that the admin code changes.

1st - Jarlsberg

2nd - Floen

Motion carried to refer to the Board.

- 6. STAFF REPORTS Director of Finance, Anne Roman mentioned that audit season is coming up. The water capacity fee study is coming up at the next Finance Committee meeting. The reserve fund policy is coming forth in the summer. Standby assessments are coming up in June, 2023. Director of Administration, David Shook asked if we can print the agendas in black and white instead of colored pages which are 10 times more costly than black and white, saving 11 cents a sheet. President Floen and Director Jarlsberg thinks that it's a great idea to print the agendas in black and white.
- 7. DIRECTOR COMMENTS Director Jarlsberg brought her latest water bill and mentioned that nothing has changed with the rates. Director of Finance, Anne Roman explained that the new rates that changed on March 1, 2023, will reflect on the May bill because we bill in arrears. President Floen asked about the Saloon project and what was the rate of the pipe before the costs went up. Projects are based upon an anticipated budget of what the cost would be.
- ADJOURNMENT President Floen adjourned meeting at 10:17 am 1st – Jarlsberg 2nd - Floen NEXT MEETING – May 10, 2023 at 9:00am

Respectfully Submitted,	
Sarah Johnson, General Manager	

Joshua Basin Water District

Agenda Item No:

Finance Committee Staff Report

MEETING DATE: 05/10/2023

PRESENTED BY: Anne Roman, Director of Finance

TOPIC: 2023 WATER CAPACITY STUDY/CHARGES & OTHER "DEVELOPMENT"

FEES

RECOMMENDATION: Review report, discuss, and recommend the proposed Water Capacity

Charge increase to the Board of Directors for approval.

ANALYSIS:

The Capacity Charge/"Fee" is a one-time charge for new connections to the water system, used to recover the rightful share of infrastructure required to serve the new connection. The objective of increasing the charge is to ensure that growth pays for infrastructure required to serve new development and helps ensure that development pays its own way. The District has historically acted in a conservative manner and considered these funds to be "legally restricted" for future growth or expansion, in comparison with using the funds immediately to reimburse for existing infrastructure.

The most recent Water Capacity charge update was done 16 years ago in 2007. Over the last several months, District staff has worked with Alex Handlers at Bartle Wells Associates on a formal Water Capacity study in conjunction with the Rate Study. Since 2007, the adopted Water Capacity charges have been adjusted annually according to the Engineering New-Record Construction Cost Index (ENR-CCI), keeping some pace with inflation. When adopted in 2007, the Capacity Charge for a new 1" meter was calculated to be \$5,042 and has escalated to \$7,932 over the past 16 years.

Various legally defensible methods exist to develop Capacity charges but the most important factor, as with rate setting, is that the charge "shall not exceed the estimated reasonable cost of providing the service for which the fee or charge is imposed" per California Government Code Section 66013. Code doesn't specify the methodology for calculation so multiple generally acceptable methodologies exist, some being more legally defensible (more conservative) or less legally defensible (more aggressive).

The proposed charges in the new Water Capacity Study are calculated using a current average cost approach in contrast with an older methodology used in 2007. Two scenarios, a full recovery scenario and an 85% cost recovery scenario, were developed. The 85% cost recovery scenario is more conservative and more legally defensible as it allows for a margin of error to avoid any potential overcharges. Staff does not recommend nor believe that the aggressive full cost recovery scenario falls within the District's risk-tolerance philosophy. On the contrary, choosing a lower cost recovery scenario than the recommended 85% begins to shift the burden of development cost to the ratepayers via rates.

Shown below are both scenarios compared with the Current costs:

Scenario	¾" meter**	1" meter	1 ½" Meter	2" Meter	3" Meter
Current Costs*	\$4,761	\$7,932	\$15,863	\$25,384	\$47,593
Proposed (85% Recovery)	\$9,552	\$12,736	\$31,840	\$50,944	\$95,520
Maximum Recovery Possible	\$11,237	\$14,982	\$37,455	\$59,928	\$112,365

^{*}Methodology was different; Recovery % not comparable.

At the more conservative 85% cost recovery scenario increases proposed above, JBWD would land on the medium-to-high side in comparison with neighboring Districts, surpassed only by Bighorn Desert View Water Agency, with a charge of \$14,641. Different levels of charges from neighboring agencies can result from any number of things, such as differences in methodologies used, different cost-recovery/risk-tolerance philosophies, etc.

In terms of total cost, Water Capacity fees are charged in addition to the meter installation fee, currently \$2,002 for a non-tract meter, and Wastewater Capacity charges of \$7,042, if required, for a total potential 1" meter cost of \$21,780. In the case of an upsizing from an existing paid ¾" to 1" meter, which could be required by the County to meet construction fire flow requirements, the customer would pay \$3,184 in capacity fees under the 85% scenario.

Please review, discuss, and recommend the proposed Water Capacity Charge increase set at 85% cost recovery to the Board of Directors for approval. Thank you!

* * * * *

Additional Development-related fee information:

- Wastewater Capacity charges (\$7,042 per EDU) will need to be addressed via a Wastewater Capacity Charge study after or along with a future updated Wastewater Treatment Strategy.
- Meter installation fees (non-tract 1" \$2,002) and upgrade fees (\$312 quoted ¾" to 1") are based on the District's cost analysis of time and materials and are set to cover but not exceed cost of service. These will be reviewed soon.
- Miscellaneous development-related fees such as meter quote fee (\$19), will-serve fee (\$33), fire-flow fee (\$217) are based on the District's cost analysis of time and materials and are designed to cover but not exceed the cost of service. These fees were updated in approximately 2019 and will be re-evaluated for anticipated increased costs as time allows.

STRATEGIC PLAN

2.8 Continue to monitor and update rates and fees to ensure financial

ITEM: viability.

Development is extremely volatile and hard to predict but based on the

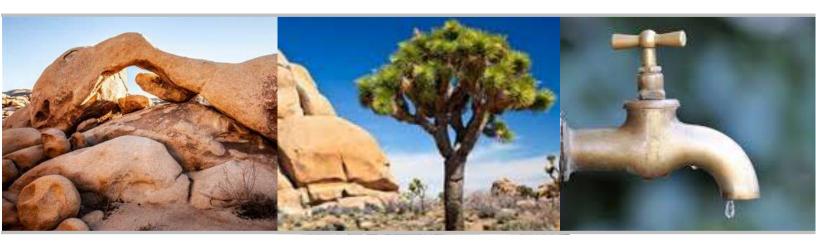

FISCAL IMPACT:

21/22 1" meter sales, an increased charge (at the proposed 85% cost recovery level) would have resulted in an annual fiscal impact (increased

collections) of \$485,204.

^{**3/4&}quot; meter included in Study for calculation of upsizing only.

Water Capacity Charge Study

April 2023

Joshua Basin Water District Water Capacity Charge Study April 2023

Prepared by:

Bartle Wells Associates 2625 Alcatraz Ave, #602 Berkeley, CA 94705 Tel: 510.653.3399 www.bartlewells.com

April 27, 2023

Joshua Basin Water District P.O. Box 675 / 61750 Chollita Road Joshua Tree, CA 92252

Bartle Wells Associates is pleased to submit the attached *Water Capacity Charge Study*. The study develops updated capacity charges designed to equitably recover the costs of water system infrastructure and assets benefitting new development.

Key objectives of the study included developing new water capacity charges that recover the costs of capacity in JBWD's water system, are fair and equitable to both existing customers and new connections, are based on industry-standard methodology, and comply with all legal requirements. The updated capacity charges calculated in this report are higher than JBWD's existing charges but are in line with the capacity charges of other surrounding water agencies.

I enjoyed working with JBWD on this assignment and much appreciate the input and assistance received from JBWD staff throughout the study process. Please contact me anytime if you have questions about the proposed capacity charges presented in this report or other related issues.

1. Background, Objectives, & Proposed Charges

Background & Objectives

Joshua Basin Water District (JBWD or District) provides water service to roughly 5,600 homes, businesses, and properties within a 96-square-mile service area in the community of Joshua Tree, California. The District is located about 125 miles east of Los Angeles in San Bernardino County, to the north of Joshua Tree National Park. JBWD was formed in 1963 and is governed by a five-member Board of Directors elected from the community.

JBWD levies Water Capacity Charges on new connections to the District's water system. These charges are one-time fees paid up-front as a condition of development and are designed to recover the costs of water system infrastructure and assets benefiting new development. These charges are also sometimes referred to as "connection fees", "facilities fees" or "impact fees". This report generally refers to these fees as "capacity charges" in line with the District's terminology and California Government Code.

The District's current water capacity charges were established by Resolution No. 07-807 which became effective January 18, 2007, over 16 years ago, and have subsequently been adjusted annually by the change in Engineering News-Record Construction Cost Index, a widely used measure of construction cost inflation.

This report develops updated water capacity charges designed to equitably recover the costs of capacity in JBWD's water system infrastructure and assets and help ensure that new development continues to pay its own way. The updated charges are designed to be fair and equitable to both existing customers and new connections, are based on industry-standard methodology, and comply with all legal requirements.

In addition to applying to new water service connections, capacity charges can also apply to existing connections when a water meter is upsized such as due to expansion, change in use, or redevelopment. In these cases, the capacity charge for the meter upsizing would be based on the incremental difference between the capacity charges in effect for the existing meter size and the upsized meter.

Government Code

Development impact fees are governed by California Government Code Section 66000 et. seq This section of the Code was initially established by Assembly Bill 1600 and is commonly referred to as the Mitigation Fee Act. Pursuant to the Code, a development impact fee is not a tax or special assessment, but is, instead, a voluntary charge levied to defray the cost of public facilities needed to serve new development.

Section 66013 of the Code specifically governs water and sewer capacity charges. This section of the Code defines a "capacity charge" to mean "a charge for public facilities in existence at the time a charge is imposed or charges for new public facilities to be acquired or constructed in the future that are of proportional benefit to the person or property being charged." The Code distinguishes "capacity charges" from "connection fees" which are defined as fees for the physical facilities necessary to make a water or sewer connection, such as costs related to installation of meters and pipelines from a new building to a water or sewer main.

A key provision of Section 66013 states that water or sewer capacity charges "shall not exceed the estimated reasonable cost of providing the service for which the fee or charge is imposed" unless approved by a two-thirds vote. As such, the capacity charges calculated in this report are conservatively calculated to ensure the proposed charges do not exceed a reasonable level. Section 66013 does not detail any specific methodology for calculating capacity fees.

Section 66016 of the Code identifies the procedural requirements for adopting or increasing water and wastewater capacity charges. Section 66022 details the general process by which the charges can be legally challenged. Section 66023 describes an agency's responsibilities if a customer requests an audit of their charge. The full text of Sections 66013, 66016, 66022 and 66023 are attached in Appendix C.

Proposed Water Capacity Charges

This report develops updated water capacity charges designed to equitably recover the costs of water system facilities and assets benefiting new development. The recommended charges are based on an *average cost approach* under which new or expanded connections would fund their proportionate share of costs for capacity in existing and planned water system facilities and assets. Under this approach, new connections pay for their proportionate share of the cost of facilities needed to meet the projected demands of JBWD's service area through 2045, corresponding with the District's planning horizon for its latest Urban Water Management Plan.

This report develops updated water capacity charges under two scenarios including a) Maximum Calculated Charges and b) Proposed Charges which account for a cost recovery factor of 85% of the estimated value of infrastructure and assets benefiting new development. By excluding 15% of the estimated costs of infrastructure, the Proposed Charges recognize that the sources of data used to calculate the updated charges are themselves estimates and provide additional assurance that the charges do not exceed the estimated reasonable cost of providing water system capacity to new development as required by California Government Code.

A schedule of Proposed Water Capacity Charges is shown on the following page. The charges for each meter size are based on an underlying unit charge per gallon per day (gpd) of water demand applied to the level of water demand associated with each meter size to reflect the proportional cost of capacity in water system infrastructure benefiting each meter size.

Capacity charges can be levied not only for new connections to the water system but can also be applied to existing connections when a water meter is upsized such as due to expansion, change in use, or redevelopment. In these cases, the capacity charges applied for the meter upsizing would be based only on the incremental increase in demand generated by the meter upsizing. For example, if an existing connection with a 3/4-inch water meter upsizes to a 1-inch meter, the capacity charge for the upsizing would be based on the incremental difference between the capacity charge in effect for a 3/4-inch meter and a 1-inch meter. Under current plumbing codes, most new single family homes are required to install 1-inch meters. The proposed charges include a capacity charge for a 3/4-inch meter primarily for calculation of an incremental capacity charge due to a meter upsizing. No refunds or reimbursements are provided for meter downsizings.

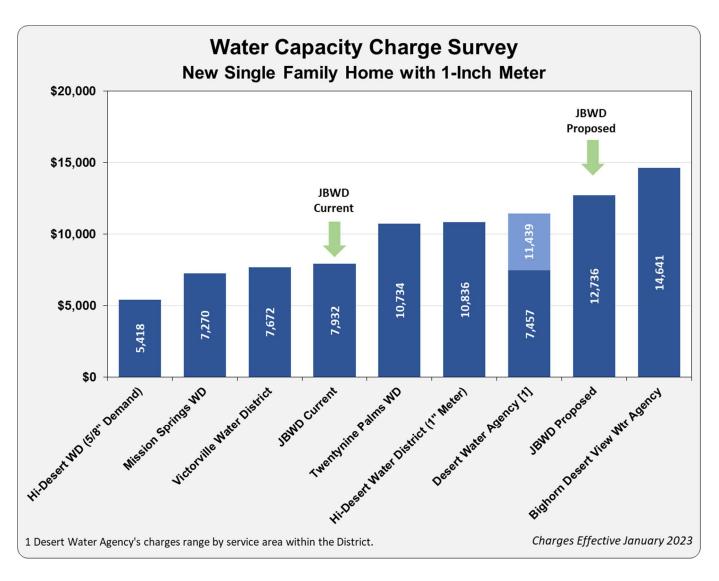

Table 1 – Proposed Water Capacity Charges

Proposed Water Capacity Charges							
Water Water Capacity							
Meter Size	Demand (gpd)	Charge					
Capacity Charge per gpd		\$63.68					
Water Capacity Charges ^{1,2}							
3/4" Meter	150	\$9,552					
1" Meter	200	12,736					
1-1/2" Meter	500	31,840					
2" Meter	800	50,944					
3" Meter	1,500	95,520					
Accessory Dwelling Units (ADUs) ³							
Attached ADU (within existing living area	No Charge						
Detached ADU (detached or with >150 sq ft expansion to the primary residence)		\$796 per					
		Plumbing Fixture Unit					

- 1 Charges for larger meters will be determined by the District on a case-by-case basis.
- 2 Standard Water Capacity Charges are shown. The District reserves the authority to determine Water Capacity Charges for new connections in instances where the estimated water demand of a new connection is significantly different than the standard demands shown above.
- 3 For Accessory Dwelling Units that meet the definition of Government Code 65852.2 et. seq.: No capacity charges may be levied on ADUs built within the living area of a primary residence subject to an allowance for an expansion of not more than 150 square feet.
- Capacity charges for detached ADUs or ADUs constructed with >150 sq. ft. expansion to the primary residence shall be based upon the number of plumbing fixture units.

Note: Capacity charges can be levied on new connections to the water system and can also be applied to existing connections due to a meter upsizing. The capacity charges applied for a meter upsizing are based on the incremental increase in demand generated by the meter upsizing as reflected by the difference between the capacity charge for the existing meter size and the new meter size.

The following chart shows a survey of regional water capacity charges for a typical new single family home. With the proposed charges, JBWD's water capacity charge for a new single family home would be one of the higher fees in the region, but within a similar range compared to surrounding water agencies.

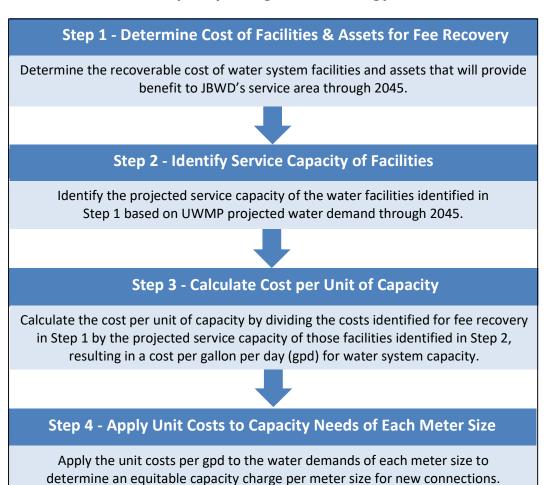

2. Water Capacity Charge Derivation

Capacity Charge Methodology

BWA recommends use of an *average cost approach* to calculate updated water capacity charges. Under this approach, new connections buy in for a proportionate share of capacity needs in existing and planned water system facilities and assets. This approach is a widely used and accepted methodology for calculating capacity charges, particularly for service areas that are largely built out but will require some additional infrastructure improvements to meet the demands of existing customers and anticipated growth. Updated capacity charges are calculated based on the total cost of facilities, including existing infrastructure and planned upgrades and expansions, divided by JBWD's total projected water demand through 2045 corresponding with the District's planning horizon for its latest Urban Water Management Plan (UWMP). The general methodology used to calculate updated water capacity charges is summarized below.

Capacity Charge Methodology

Water System Overview

JBWD's water system includes roughly 310 miles of water distribution pipelines, 5 wells, 17 water storage tanks, 11 booster stations and a groundwater recharge facility. Many of JBWD's water distribution pipelines are approaching the end of their useful lives and will need to be replaced and upsized to provide safe and reliable service to both existing customers and growth. JBWD relies on groundwater for 100% of the community's water supply. Starting in 2015, JBWD began purchasing and importing water from Mojave Water Agency via the 71-mile Morongo Basin Pipeline to help recharge the local groundwater basin and help mitigate local groundwater depletion.

Water System Infrastructure for Cost Recovery

Under the methodology used in this report, water capacity charges are designed to recover estimated costs of the District's water system infrastructure and assets in current dollars including a) existing facilities and assets and b) capital improvements needed to meet projected customer demand through 2045.

At the same time, the proposed charges exclude some costs from the fee calculation to ensure the updated charges are reasonable and equitable. These excluded costs include a) existing Water Capacity Charge Fund Reserves that the District will be applying to it capital program, and b) the share of capital improvements that constitute rehabilitation or replacement of existing infrastructure. By excluding cost recovery for these items, the proposed fees help ensure that new connections will not have to pay for the same facilities both through capacity charges and also via water service charges once they become ongoing customers.

Table 1 shows a summary of water system fixed assets based on the District's Fixed Asset Schedule as of June 30, 2022. A Fixed Asset Schedule detailing all of the individual assets summarized on Table 1 is included in Appendix B.

The table shows the acquisition cost of each asset along with the "ENR-Adjusted Net Asset Value". This value represents the depreciated value of each asset escalated into current dollars based on the change in the Engineering News-Record Construction Cost Index, a widely used measure of construction cost inflation. This valuation approach is commonly referred to as

Replacement Cost New Less Depreciation or RCNLD and helps ensure that the updated charges only recover the remaining value of assets in current dollars. BWA believes this results in a conservative fee calculation as many assets are in service for a period that exceeds their accounting depreciation life.

The table also indicates which assets are included for fee recovery via the updated capacity charges. Some of the assets, including the cost of various studies and water meters, were not deemed appropriate for inclusion in the updated fee calculation by the District's project team.

Table 2 lists the projects included in JBWD's capital improvement program along with current cost estimates and shows the share of project costs allocated to either a) Rehab/Replacement or b) Expansion/Upgrade. The updated fee calculation only includes cost recovery for the share of capital improvement costs allocated to Expansion/Upgrade and excludes costs related to infrastructure Rehab/Replacement which are projected to be funded over time by District ratepayers.

² Costs adjusted from July 2015 cost basis to January 2023 based on the change in the ENR Construction Cost Index (20-Cities Avg Index)

³ Project cost allocations provided by Dudek Engineers.

Water System Cost Recovery

Table 3 details the amount of costs of the District's water system recovered by the updated capacity charges and calculates a capacity charge per gallon per day (gpd) of water demand. The table includes fee recovery for:

- The ENR-Escalated Depreciated Net Asset Value of existing infrastructure identified for fee recovery from Table 1
- Buy-in for a proportionate share of Water Operating and Capital Fund Reserves (as of June 30, 2022), excluding Water Capacity Charge Reserves. This buy-in is designed to bring new connections on parity with existing customers so that new connections will not unfairly benefit from fund reserves accrued from existing customers.
- The share of capital improvement plan costs allocated to Expansion/Upgrade but excludes capital costs allocated to Rehab/Replacement.

The table divides a) the total costs included for fee recovery by b) a conservatively high estimate of water demand based on 110% of UWMP demand projections through 2045 resulting in c) a conservative estimate of the unit cost for capacity in JBWD water system infrastructure and assets. The resulting unit charge per gpd gets applied to the estimated water demands of different meter sizes to determine an updated Water Capacity Charge for each meter size.

Table 4 – Water System Cost Recovery

Water Infrastructure & Assets for Fee Recovery		
Existing Infrastructure & Assets		
ENR-Escalated Depreciated Net Asset Value		\$46,566,617
Buy-In for Share of Fund Reserves (June 30, 2022)		
Water Operating & Capital Fund Reserves		12,846,000
Less Water Capacity Charge Reserves		(993,425
Subtotal		11,852,575
Subtotal		11,832,373
Capital Improvements		
Expansion/Upgrade		23,752,804
Rehab/Replacement ¹		-
Subtotal		23,752,804
Total Costs for Fee Recovery		82,171,996
Water System Projected Demand ²		
Total projected demand through 2045 (AF)	AF	1,229
Total projected demand through 2045 (gpd)	gpd	1,096,911
Water Capacity Charge per Unit		
\$ per AF		\$66,877
\$ per gpd		\$74.91

¹ Assumes costs for Rehab/Replacement will recovered by monthly water service charges; new connections will contribute when they become ongoing water customers.

² Based on 110% of 2020 Urban Water Management Plan projections through 2045 (Table 2-10); for comparison, total water demand in Fiscal Year 2021/22 was approximately 1,200 AF.

Maximum Water Capacity Charges

Table 4 shows Maximum Water Capacity Charges calculated by multiplying the unit capacity charge per gpd developed in Table 3 by the estimated water demands for each meter size. Most of JBWD's residential customers have historically been served by 3/4-inch meters. However due to newer plumbing code requirements related to fire sprinklers, new single family homes are typically served by 1-inch meters. Hence the estimated water demand for 1-inch meters is based on average annual water use by existing 3/4-inch and 1-inch meters in recent years.

Water demand for larger meter sizes is based on the capacity of each meter size in relation to the capacity of the base 3/4-inch meter, in alignment with standard American Water Works Association meter capacities. For example, a 3-inch meter has approximately 10 times the capacity as the base 3/4-inch meter size and correspondingly would pay a capacity charge that is 10 times that of the base meter size.

Table 5 – Maximum Water Capacity Charges

	Water	Water Capacity
Meter Size	Demand (gpd)	Charge
Unit Charge per gpd		\$74.91
Water Capacity Charges ^{1,2}		
3/4" Meter	150	\$11,237
1" Meter	200	14,982
1-1/2" Meter	500	37,455
2" Meter	800	59,928
3" Meter	1,500	112,365
Accessory Dwelling Units (ADUs) ³		
Attached ADU (within existing living area with up	No Charge	
Detached ADU (detached or with >150 sq ft expan	\$936 per	
		Plumbing Fixture Unit

¹ Charges for larger meters will be determined by the District on a case-by-case basis.

Capacity charges for detached ADUs or ADUs constructed with >150 sq. ft. expansion to the primary residence shall be based upon the number of plumbing fixture units.

² Standard Water Capacity Charges are shown. The District reserves the authority to determine Water Capacity Charges for new connections in instances where the estimated water demand of a new connection is significantly different than the standard demands shown above.

³ For Accessory Dwelling Units that meet the definition of Government Code 65852.2 et. seq.: No capacity charges may be levied on ADUs built within the living area of a primary residence subject to an allowance for an expansion of not more than 150 square feet.

Proposed Water Capacity Charges

This study proposes the District adopt Water Capacity Charges that are 85% of the calculated Maximum Capacity Charges. By only including 85% of the estimated recoverable costs of infrastructure and assets, the fee calculation recognizes that the sources of data used to calculate the updated charges are themselves estimates and provides additional assurance that the proposed charges do not exceed the estimated reasonable cost of providing system capacity to new development as required under California Government Code.

Table 5 on the following page shows a schedule of proposed water capacity charges. As previously noted, the charges are calculated based on an 85% cost recovery factor for water system infrastructure which balances the goals of a) reasonably and conservatively recovering the cost of facilities benefitting new development while b) ensuring that the fees do not exceed the estimated reasonable cost of facilities benefitting growth in compliance with California Government Code.

In addition to showing charges for each meter size, the table also shows charges for Accessory Dwelling Units (ADUs). Pursuant to Government Code, JBWD cannot assess a water capacity charge on "Attached ADUs" that are built within the existing living area of a home (with an allowance for up to 150 square feet of building expansion). However, the District can levy a capacity charge on new "Detached ADUs" that are either a) constructed as separate residential unit that is not attached to the existing home, or b) is built partially within the living space of an existing home but includes more than 150 square feet of new building area. Charges for these "Detached ADUs" are applied based on each ADU's number of plumbing fixture units in compliance with California Government Code as described subsequently in this report.

Capacity charges can be levied on new connections to the water system and can also be applied to existing connections due to a meter upsizing. The capacity charges applied for a meter upsizing should be based only on the incremental increase in demand generated by the meter upsizing based on the difference between the capacity charges in effect for the existing meter and the upsized meter. In cases where an existing home is adding an ADU and upsizing its water meter, capacity charges for the ADU (when applicable) and for the meter upsizing shall be calculated and applied separately.

Table 6 – Proposed Water Capacity Charges

	Water	Water Capacity
Meter Size	Demand (gpd)	Charge
Unit Charge per gpd (Maximum Calculated Charge)		\$74.91
Fee Recovery %		<u>85%</u>
Proposed Charge per gpd		63.68
Water Capacity Charges ^{1,2}		
3/4" Meter	150	\$9,552
1" Meter	200	12,736
1-1/2" Meter	500	31,840
2" Meter	800	50,944
3" Meter	1,500	95,520
Accessory Dwelling Units (ADUs) ³		
Attached ADU (within existing living area with up to 150 sq ft expansion)		No Charge
Detached ADU (detached or with >150 sq ft expansion to the primary residence)		\$796 per Plumbing Fixture Unit

¹ Charges for larger meters will be determined by the District on a case-by-case basis.

² Standard Water Capacity Charges are shown. The District reserves the authority to determine Water Capacity Charges for new connections in instances where the estimated water demand of a new connection is significantly different than the standard demands shown above.

³ For Accessory Dwelling Units that meet the definition of Government Code 65852.2 et. seq.:

No capacity charges may be levied on ADUs built within the living area of a primary residence subject to an allowance for an expansion of not more than 150 square feet.

Capacity charges for detached ADUs or ADUs constructed with >150 sq. ft. expansion to the primary residence shall be based upon the number of plumbing fixture units.

Accessory Dwelling Units

Accessory Dwelling Units (ADUs) are generally defined as secondary independent residential dwelling units located on a residential property and may include a) second units within or attached to the living area of an existing primary residence, and b) detached accessory dwelling units. California Government Code Section 65852.2 governs accessory dwelling units and includes the following requirements regarding water and sewer capacity charges for ADUs:

- ADUs within the living area of a primary residence "shall not be considered to be a new residential use for the purposes of calculating connection fees or capacity charges for utilities, including water and sewer service." Hence, the District may not levy capacity charges on ADUs that meet the requirements of the Code and are constructed within the living area of primary residence. To be considered within the living area of a primary residence, the Code permits "an expansion of not more than 150 square feet beyond the same physical dimensions as the existing accessory structure."
- Detached ADUs, or ADUs that require expansion of a primary residence in excess of 150 square feet "may require a new or separate utility connection directly between the accessory dwelling unit and the utility. Consistent with Section 66013, the connection may be subject to a connection fee or capacity charge that shall be proportionate to the burden of the proposed accessory dwelling unit, based upon either its size or the number of its plumbing fixtures, upon the water or sewer system."

In compliance with the Code, the capacity charges for ADUs eligible to pay such charges are proposed to be calculated based on the number of plumbing fixture units of each ADU. The charge per fixture unit is based on the proposed capacity charge for the base meter size (up to 1-inch) divided by 16 plumbing fixture units which represents a conservatively high estimate of the number of plumbing fixture units for a typical single family home in the District. As such, each ADU will only pay for a capacity charge based on its proportionate share of demand compared to that of a typical single family home.

In cases where an existing home is adding an ADU and upsizing its water meter, capacity charges for the ADU (when applicable) and for the meter upsizing shall be calculated and applied separately.

3. Application of Charges & Related Issues

This section highlights some key issues regarding the application and implementation of the updated capacity charges.

Capacity Charge Ordinance: Purpose of Charge

Pursuant to Government Code, revenues derived from JBWD's capacity charges can only be used for the purpose for which the charges are collected. In order to maximize flexibility for use of capacity charge revenues, BWA recommends that the ordinance or resolution adopting the new capacity charges broadly define the purpose of the charge, such as to recover a proportionate share of costs for capacity in existing and future water system infrastructure and assets.

Use of Capacity Charge Revenues

The proposed capacity charges recover costs for buying in to existing facilities and assets as well as funding a portion of capital improvements allocated for expansion and upgrade. A substantial portion of the updated charge is designed to recover costs for existing infrastructure. As such, a substantial portion of the revenues derived from the updated capacity charges represent a reimbursement for previously-funded facilities. Hence, a corresponding share of capacity charge revenues can be used to help fund rehabilitation and replacement of existing infrastructure.

Capacity Charges for Expansions or Redevelopment Projects

In addition to applying to new water service connections, capacity charges can also apply to existing connections when a water meter is upsized such as due to expansion, change in use, or redevelopment. In these cases, the capacity charges applied for the meter upsizing would be based only on the incremental increase in demand generated by the meter upsizing. For example, if a customer with a 2-inch meter upsized to a 3-inch meter, the water capacity charge would be based on the difference between the capacity charge in effect for a 2-inch meter and the charge for a 3-inch meter resulting in a capacity charge that only reflects the increase in water demand associated with the meter upsizing. Likewise, if an account with a locked 3/4-inch meter was required to upsize to a 1-inch meter as a condition of development, the account would only need to pay the incremental difference between the charge for a 3/4-inch meter and the charge for a 1-inch meter.

Capacity Charges for Connections with Non-Standard Demands

The proposed capacity charges apply to standard new connections with typical levels of water demand per meter size. The District should reserve the authority to determine capacity charges for non-standard connections on a case-by-case basis to help ensure the charges reflect the estimated demand of each connection.

Other Developer Infrastructure Funding Requirements

Payment of capacity charges does not exempt a developer from having to fund the upsizing of infrastructure in cases where existing infrastructure is inadequate to meet the water demands of the project. As such, the District could require a developer to fund the upsizing of a water pipeline or booster station if needed to handle the project's water demands. For example, if a large new development is built in an area served by pipelines that do not have adequate capacity to serve the development, the District could require the developer to fund the required pipeline upsizings as a condition of development.

Future Fee Adjustments

In future years, BWA recommends that JBWD continue its historical practice of adjusting its water capacity charges annually based on the change in the Engineering News-Record Construction Cost Index to account for future construction cost inflation. The fee adjustment should be based on the change in the ENR index associated with the preceding fee update, not simply the prior year, to allow for a multi-year adjustment if the District ever opted to temporarily defer an annual adjustment. The District's ordinance or resolution adopting new capacity charges can allow for automatic annual adjustments, but the Board of Directors would always retain the authority to defer an adjustment.

Additionally, BWA recommends that capacity charges be independently reviewed and/or updated roughly once every 5 years, or sooner if there are substantial changes to the District's projected growth or capital program.

APPENDIX A

Current Capacity Charges

Table A
Joshua Basin Water District
Current Meter Installation & Capacity Charges

Fees Effective Jan-1, 2022

	Meter Install	ation Charges	Capacity	^r Charges
	Tract			Wastewater
Meter Size	Installation	Installation	Charge	Capacity Charge
3/4" Meter	\$585	\$1,911	\$4,761	\$7,042 per EDU
1" Meter	669	2,002	7,932	\$7,042 per EDU
1-1/2" Meter	Cost + 15%	Cost + 15%	15,863	\$7,042 per EDU
2" Meter	Cost + 15%	Cost + 15%	25,384	\$7,042 per EDU
3" Meter	Cost + 15%	Cost + 15%	47,593	\$7,042 per EDU

New connections pay either the tract or non-tract installation charge depending on location, plus the corresponding water and wastewater capacity charges.

APPENDIX C

California Government Code: Key Sections Pertaining to Capacity Charges

California Government Code Key Sections Pertaining to Water & Sewer Capacity Charges Sections 66013, 66016, 66022 & 66023

66013

(a) Notwithstanding any other provision of law, when a local agency imposes fees for water connections or sewer connections, or imposes capacity charges, those fees or charges shall not exceed the estimated reasonable cost of providing the service for which the fee or charge is imposed, unless a question regarding the amount of the fee or charge imposed in excess of the estimated reasonable cost of providing the services or materials is submitted to, and approved by, a popular vote of two-thirds of those electors voting on the issue.

(b) As used in this section:

- (1) "Sewer connection" means the connection of a structure or project to a public sewer system.
- (2) "Water connection" means the connection of a structure or project to a public water system, as defined in subdivision (f) of Section 116275 of the Health and Safety Code.
- (3) "Capacity charge" means a charge for public facilities in existence at the time a charge is imposed or charges for new public facilities to be acquired or constructed in the future that are of proportional benefit to the person or property being charged, including supply or capacity contracts for rights or entitlements, real property interests, and entitlements and other rights of the local agency involving capital expense relating to its use of existing or new public facilities. A "capacity charge" does not include a commodity charge.
- (4) "Local agency" means a local agency as defined in Section 66000.
- (5) "Fee" means a fee for the physical facilities necessary to make a water connection or sewer connection, including, but not limited to, meters, meter boxes, and pipelines from the structure or project to a water distribution line or sewer main, and that does not exceed the estimated reasonable cost of labor and materials for installation of those facilities.
- (6) "Public facilities" means public facilities as defined in Section 66000.

- (c) A local agency receiving payment of a charge as specified in paragraph (3) of subdivision (b) shall deposit it in a separate capital facilities fund with other charges received, and account for the charges in a manner to avoid any commingling with other moneys of the local agency, except for investments, and shall expend those charges solely for the purposes for which the charges were collected. Any interest income earned from the investment of moneys in the capital facilities fund shall be deposited in that fund.
- (d) For a fund established pursuant to subdivision (c), a local agency shall make available to the public, within 180 days after the last day of each fiscal year, the following information for that fiscal year:
 - (1) A description of the charges deposited in the fund.
 - (2) The beginning and ending balance of the fund and the interest earned from investment of moneys in the fund.
 - (3) The amount of charges collected in that fiscal year.
 - (4) An identification of all of the following:
 - (A) Each public improvement on which charges were expended and the amount of the expenditure for each improvement, including the percentage of the total cost of the public improvement that was funded with those charges if more than one source of funding was used.
 - (B) Each public improvement on which charges were expended that was completed during that fiscal year.
 - (C) Each public improvement that is anticipated to be undertaken in the following fiscal year.
 - (5) A description of each interfund transfer or loan made from the capital facilities fund. The information provided, in the case of an interfund transfer, shall identify the public improvements on which the transferred moneys are, or will be, expended. The information, in the case of an interfund loan, shall include the date on which the loan will be repaid, and the rate of interest that the fund will receive on the loan.
- (e) The information required pursuant to subdivision (d) may be included in the local agency's annual financial report.
- (f) The provisions of subdivisions (c) and (d) shall not apply to any of the following:

- (1) Moneys received to construct public facilities pursuant to a contract between a local agency and a person or entity, including, but not limited to, a reimbursement agreement pursuant to Section 66003.
- (2) Charges that are used to pay existing debt service or which are subject to a contract with a trustee for bondholders that requires a different accounting of the charges, or charges that are used to reimburse the local agency or to reimburse a person or entity who advanced funds under a reimbursement agreement or contract for facilities in existence at the time the charges are collected.
- (3) Charges collected on or before December 31, 1998.
- (g) Any judicial action or proceeding to attack, review, set aside, void, or annul the ordinance, resolution, or motion imposing a fee or capacity charge subject to this section shall be brought pursuant to Section 66022.
- (h) Fees and charges subject to this section are not subject to the provisions of Chapter 5 (commencing with Section 66000), but are subject to the provisions of Sections 66016, 66022, and 66023.
- (i) The provisions of subdivisions (c) and (d) shall only apply to capacity charges levied pursuant to this section.

(Amended by Stats. 2007, Ch. 94, Sec. 1. Effective January 1, 2008.)

66016

(a) Prior to levying a new fee or service charge, or prior to approving an increase in an existing fee or service charge, a local agency shall hold at least one open and public meeting, at which oral or written presentations can be made, as part of a regularly scheduled meeting. Notice of the time and place of the meeting, including a general explanation of the matter to be considered, and a statement that the data required by this section is available, shall be mailed at least 14 days prior to the meeting to any interested party who files a written request with the local agency for mailed notice of the meeting on new or increased fees or service charges. Any written request for mailed notices shall be valid for one year from the date on which it is filed unless a renewal request is filed. Renewal requests for mailed notices shall be filed on or before April 1 of each year. The legislative body may establish a reasonable annual charge for sending notices based on the estimated cost of providing the service. At least 10 days prior to the meeting, the local agency shall make available to the public data indicating the amount of cost, or estimated cost, required to provide the service

for which the fee or service charge is levied and the revenue sources anticipated to provide the service, including General Fund revenues. Unless there has been voter approval, as prescribed by Section 66013 or 66014, no local agency shall levy a new fee or service charge or increase an existing fee or service charge to an amount which exceeds the estimated amount required to provide the service for which the fee or service charge is levied. If, however, the fees or service charges create revenues in excess of actual cost, those revenues shall be used to reduce the fee or service charge creating the excess.

- (b) Any action by a local agency to levy a new fee or service charge or to approve an increase in an existing fee or service charge shall be taken only by ordinance or resolution. The legislative body of a local agency shall not delegate the authority to adopt a new fee or service charge, or to increase a fee or service charge.
- (c) Any costs incurred by a local agency in conducting the meeting or meetings required pursuant to subdivision (a) may be recovered from fees charged for the services which were the subject of the meeting.
- (d) This section shall apply only to fees and charges as described in Sections 51287, 56383, 65104, 65456, 65584.1, 65863.7, 65909.5, 66013, 66014, and 66451.2 of this code, Sections 17951, 19132.3, and 19852 of the Health and Safety Code, Section 41901 of the Public Resources Code, and Section 21671.5 of the Public Utilities Code.
- (e) Any judicial action or proceeding to attack, review, set aside, void, or annul the ordinance, resolution, or motion levying a fee or service charge subject to this section shall be brought pursuant to Section 66022.

(Amended by Stats. 2006, Ch. 643, Sec. 19. Effective January 1, 2007.)

66022

(a) Any judicial action or proceeding to attack, review, set aside, void, or annul an ordinance, resolution, or motion adopting a new fee or service charge, or modifying or amending an existing fee or service charge, adopted by a local agency, as defined in Section 66000, shall be commenced within 120 days of the effective date of the ordinance, resolution, or motion.

If an ordinance, resolution, or motion provides for an automatic adjustment in a fee or service charge, and the automatic adjustment results in an increase in the amount of a fee or service charge, any action or proceeding to attack, review, set aside, void, or

annul the increase shall be commenced within 120 days of the effective date of the increase.

- (b) Any action by a local agency or interested person under this section shall be brought pursuant to Chapter 9 (commencing with Section 860) of Title 10 of Part 2 of the Code of Civil Procedure.
- (c) This section shall apply only to fees, capacity charges, and service charges described in and subject to Sections 66013, 66014, and 66016.

(Amended by Stats. 2006, Ch. 643, Sec. 20. Effective January 1, 2007.)

66023

- (a) Any person may request an audit in order to determine whether any fee or charge levied by a local agency exceeds the amount reasonably necessary to cover the cost of any product, public facility, as defined in Section 66000, or service provided by the local agency. If a person makes that request, the legislative body of the local agency may retain an independent auditor to conduct an audit to determine whether the fee or charge is reasonable, but is not required to conduct the audit if an audit has been performed for the same fee within the previous 12 months.
- (b) To the extent that the audit determines that the amount of any fee or charge does not meet the requirements of this section, the local agency shall adjust the fee accordingly. This subdivision does not apply to a fee authorized pursuant to Section 17620 of the Education Code, or Sections 65995.5 and 65995.7.
- (c) Except as otherwise provided in subdivision (h), the local agency shall retain an independent auditor to conduct an audit only if the person who requests the audit deposits with the local agency the amount of the local agency's reasonable estimate of the cost of the independent audit. At the conclusion of the audit, the local agency shall reimburse unused sums, if any, or the requesting person shall pay the local agency the excess of the actual cost of the audit over the sum which was deposited.
- (d) Any audit conducted by an independent auditor to determine whether a fee or charge levied by a local agency exceeds the amount reasonably necessary to cover the cost of providing the product or service shall conform to generally accepted auditing standards.

- (e) The procedures specified in this section shall be alternative and in addition to those specified in Section 54985.
- (f) The Legislature finds and declares that oversight of local agency fees is a matter of statewide interest and concern. It is, therefore, the intent of the Legislature that this chapter shall supersede all conflicting local laws and shall apply in charter cities.
- (g) This section shall not be construed as granting any additional authority to any local agency to levy any fee or charge which is not otherwise authorized by another provision of law, nor shall its provisions be construed as granting authority to any local agency to levy a new fee or charge when other provisions of law specifically prohibit the levy of a fee or charge.
- (h) Notwithstanding subdivision (c), if a local agency does not comply with subdivision (b) of Section 66006 following the establishment, increase, or imposition of a fee, but requires payment of that fee in connection with the approval of a development project for three consecutive years, the local agency shall not require a deposit for an independent audit requested pursuant to this section and shall pay the cost of the audit.

(Amended by Stats. 2018, Ch. 357, Sec. 1. (SB 1202) Effective January 1, 2019.)
